why you should consider avfi for your next project

call us..

we deliver.

Company Overview

avfi valve solutions is a leading provider of Gate, Knife, Check, Plug, Ball, Air Release & Actuated Valves for Waterworks projects throughout Australia. In a fast paced highly specialised industry, avfi has earned a reputation as a supplier of choice by providing cost effective valve solutions and by meeting demanding delivery schedules.

Key elements of our specialised services includes high inventory levels and our experience in building valve assemblies to order.

Since 1994, avfi has manufactured and imported products that meet Australian standards, WSSA standards or where none exist British standards and/or ISO standards.

Professional Ethics

avfi is a ISO 9001: 2008 Quality Management Systems Certified Business. Our dedication to continuous improvement in all areas of our business, from product performance to customer service, keeps our staff in step with the level of quality service and product standards expected by our clients. We will work tirelessly to remain an Australian leading provider of water management solutions to government and non-government sectors.

Professional Customer Service

avfi has a strong belief in delivering professional service to its clients that is why our staff are ready to welcome your call in real time, transferring you to the appropriate company representative at the earliest possible moment.

Technical Experience

Our trained staff will provide a thorough understanding of the scope of your product applications. They understand the need to respond quickly to your requirements for pricing, product availability and delivery.

Every day avfi clients such as Engineers, Consultants and Industry Representatives receive a high level of technical support from our experienced Valve Technicians who respond with cost effective product or system recommendations to match the applications.

Project Management

For each and every contract agreement, avfi provides a quality plan which provides the frame work for reliable and accurate deliveries of products and documents matching the project schedules.

Communication is the key to the successful management of our customer's orders being delivered on time from our distribution facilities. Frequent updates are provided to ensure our client's expectations are met regarding each stage of the schedule.

Project Experience

Our clients include Local, State and Commonwealth Government Departments and agencies, public and private industry stakeholders, manufacturers and distribution outlets located across Australia and abroad.

Our experience in managing large scale project deliverables confirms our clients' expectations and requirements are carefully measured and understood from the beginning of our engagement.

Thermoplastic Valves
